

HIGH-PERFORMANCE CO-EXTRUDED SHRINK FILMS

Engineered for Performance. Built for Your Application.

Revolution manufactures high-performance co-extruded shrink films engineered for demanding bundling and packaging applications. Using advanced blown-film technology and carefully selected LDPE, LLDPE, and mLLDPE resin combinations, our films deliver the **strength, consistency, shrink performance, puncture resistance, and machinability** required by today's high-speed packaging operations.

ENGINEERED TO RUN ON YOUR EQUIPMENT

Our machine-specific films are engineered for your equipment to maximize throughput, package appearance, seal performance, and overall efficiency.

FILM	APPLICATION	KEY PERFORMANCE ADVANTAGE
F321	High-Speed Mechanical Cut Single-Roll Bundling	Engineered for high-speed single-roll bundling machines to maximize throughput while maintaining package appearance and load integrity.
F159	Seal Bar Equipment	Designed for high-speed dual roll seal-bar applications where strong seals are critical, with the ability to achieve excellent seal performance at lower operating temperatures.
F304	Dual-Equipment Application	Engineered to run on both high-speed single-roll bundling and seal-bar equipment while maintaining machinability, appearance, and package integrity. This is ideal for a company that has several shrink tunnels but only wants one film.

PERFORMANCE YOU CAN COUNT ON

High-Speed Processing

Designed for stable, efficient performance on demanding packaging equipment.

Consistent Gage & Quality

Advanced co-extrusion and blown-film technology provide dependable film consistency from run to run.

Strength & Durability

Engineered resin combinations provide excellent tensile strength, puncture resistance, and load integrity.

Application Flexibility

Available in a variety of gauges and widths to meet specific customer and equipment requirements.

Package Appearance

Designed to deliver clean, consistent packages while maintaining the performance required for demanding applications.

IDEAL FOR A WIDE RANGE OF APPLICATIONS

Beverage • Food • Consumer Products • Industrial • Distribution & Logistics

WHY REVOLUTION?

Technical Expertise | Advanced Manufacturing | Consistent Quality | Customer-Focused Support

Revolution Company combines advanced manufacturing capabilities with technical expertise and a customer-focused approach to deliver shrink film solutions that perform in the real world.

From **machine compatibility and throughput to package integrity and consistency**, our goal is simple: **provide the right film for the application and help our customers get the most from their equipment.**

REVOLUTION

High-Performance Co-Extruded Shrink Film Solutions

Serving Customers Throughout North America
